Contract Code	Contract Name	Expiry Date	Fixed Margin	Spread Margin	VSR	SSMR
EUUS	Euro / Dollar (€ / \$)	2013/12/13	340	15	2.5	0
EUUS	Euro / Dollar (€ / \$)	2014/03/17	340	15	2.5	0

What is commonly referred to as a 'Quanto Derivative' is in fact a derivative (future or option) where the underlying product traded references a foreign underlying but the instrument itself is settled in another currency (South African Rand), at a fixed rate. These products internationally have been attractive to market participants who wish to have exposure to a foreign asset or commodity but without the corresponding exchange rate risk.

The Quanto future would merely mirror the underlying movement on a 1 for 1 basis yet traded and tracked in Rands.

For example:

If the price of the Euro/Dollar increases by 2% in Dollar terms, then the value of the investor's Rand position in Euro/Dollar (via the Quanto product) will also increase by 2%.

	Euro/Dollar	Quanto Euro/Dollar
Traded Price 1	\$ 1.3300	R 1.3300
Increase in price	2%	2%
Traded Price 2	\$ 1.3500	R 1.3500
Price movement	\$ 0.02	R 0.02

This equates to a positive movement of R0.02 for the market participant who bought the contract and a negative movement of R0.02 for the participant who sold the contract.

With a price movement of R0.02 (200 points), if you traded 1 contract (nominal of 10,000) the profit/loss will be R200.

The above instrument has been designated as "Foreign" by the South African Reserve Bank.
